

Keen to find out what ETITO's got planned for your industry in 2010?

December 2009

If you're keen to find out what activity we've got planned in your industry in 2010, then check out our 2010 Annual Industry Statements. These important documents incorporate ETITO's statutory obligations and emerging industry priorities and outline ETITO's approach to delivering industry training services across six of the industries within our coverage.

Each Annual Industry Statement will be refined and reviewed on an annual basis to ensure ETITO continues to respond to changing industry needs while fostering high levels of training achievement and providing training support services.

In 2010 ETITO's work with the Financial Services industry will continue to focus on activities centred around the design and implementation of the centrally administered assessment system required for adviser authorisation. Due to the dynamic and specific nature of this project ETITO has not published a 2010 Annual Industry Statement for the Financial Services industry.
